LTA-380

Teller Cash Recycler

Use the power of innovative cash recycling with the new high-capacity LTA-380; a teller-friendly solution that delivers optimal efficiency, convenience and security - all while allowing you to build better relationships with your customers. The LTA-380 can elevate service levels and increase profitability at the same time.

- **UNATTENDED SELF-AUDITING**

Eliminates hand counting of cash inventory. With other recyclers, all cash still has to be physically removed to verify and balance.

- **16,250 NOTE CAPACITY**

Using cassette-based technology, the LTA-380 dispenses 16,250 notes and recycles 12,000 notes, surpassing most recyclers in the industry.

- **CONTINUOUS FEEDING**

Most recyclers only accept 100 - 200 notes at a time. The LTA-380 allows you to continually process cash without having to stop and begin another.

- **SECURE TRANSIT CASSETTE**

Dramatically reduce cash exposure during vault buys and sells. Cash can now be transported securely to and from the vault to the cash recycler.

- **COUNTERFEIT POCKET**

The LTA-380 features a dedicated counterfeit suspect pocket. No longer are counterfeit notes mixed with notes ejected for other reasons.

- **SERIAL NO. & NOTE IMAGING**

The LTA-380 records serial numbers and has the unique feature of recording an actual image of the front and back of each note.

LTA-380 Specifications

- Cassette Recycling Storage Technology
- 8" Tilting Color Touch Screen
- Up to 16,250 Notes Dispense Only
- Up to 12,000 Notes Recyclable
- Speed: 12 Notes/Second
- Input Bin: 600 Notes
- Reject Bin: 300 Notes
- Quick Count Functionality
- Continuous Feed
- Automatic, Unattended Self-auditing
- Cassette Tamper Indicator
- Serial Number Recognition
